/clone_Tis strand cDNA was primed with a Not1-oligo(dT)
primer. Five prime end enriched, double-strand cDNA was
digested with Not I and cloned into the Not I and EcoR V
sites of the pCMVSPORT 6 vector. Library was normalized.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        486 GACTGGGGAGTAGATCTGCTAAAATTTGATGGTTGTTACTGTGACAGTTTGGAAAATTTG

18t strand cDNA was primed with a NotI-oligo(dT) primer. Five prime

end enriched, double-strand cDNA was digested with Not I and cloned

into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library

was normalized. Library was constructed by Life Technologies, a

division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                EST 06-APR-2004

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 3, Application US/10103327

Sequence 3, Application US/10103327

Patent No. 6890748

GENERAL INFORMATION:
APPLICANT: CARGER, Stephen A.
APPLICANT: TURPEN, Thomas H.
APPLICANT: TURPEN, TOWNEN, MONTO H.
TITLE OF INVENTION: PRODUCTION OF LYSOSOWAL ENZYMES IN
TITLE OF INVENTION: PRODUCTION OF LYSOSOWAL ENZYMES IN
TITLE OF INVENTION: PRODUCTION OF LYSOSOWAL ENZYMES IN
TITLE OF INVENTION: PLANTS BY TRANSIENT EXPRESSION
FILE REFERENCE: 008010087CPUS06
CURRENT FILING DATE: 2002-03-20
PRIOR FILING DATE: 2001-11-13

NUMBER OF SEQ ID NOS: 37

SEQUENCE FRANKE: FRANKE FRANK
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1; Indels
